

ELECTION OF INVENTIONS:

The Patent Examiner has required the selection of one of the following groups of Inventions for further prosecution:

Group I:           Claims 1-5, drawn to use of a sterile aqueous solution;

Group II:           Claims 6-24, drawn to a method of punctual stimulation therapy;

Group III:           Claim 25, drawn to a set comprising a sterile aqueous solution; and

Group IV:           Claim 26, drawn to using a set comprising a sterile aqueous solution.

ELECTION:

Applicant respectfully elects, with traverse, the invention of Group II, claims 6-24, drawn to a method of punctual stimulation therapy, for further prosecution.
